Career Objective:

I am a highly skilled front-end developer with 4.3 years of experience in building responsive and user-friendly web applications using React JS. I have a strong understanding of web development concepts, including HTML, CSS, JavaScript, Bootstrap(3,4,5) and various front-end frameworks. I am a quick learner, self-motivated, and passionate about creating clean and efficient code.

Experience:

Currently Working Senior Front End Developer.

Arham Software House

- Developed and maintained the company's React-based web applications and contributed to the overall improvement of the user experience.
- Collaborated with cross-functional teams including UX/UI designers, backend developers, and QA testers to develop high-quality, scalable, and responsive web applications.
- Designed and implemented responsive UI components using React, HTML, CSS, and JavaScript, ensuring a seamless user experience across all devices.
- Used Git for version control, collaborated with team members using GitHub, and implemented continuous integration and deployment processes.
- Optimized website performance and SEO by applying best practices in web development, including lazy loading, code splitting, and browser caching.

Jan 2018 - Nov 2019 Front End Developer.

Zeikh Technologies

- Worked on a team to develop and maintain a large-scale React-based web application used by thousands of users daily.
- Implemented new features, bug fixes, and performance improvements using React, Redux, HTML, CSS, and JavaScript.
- Developed and maintained RESTful APIs using Node.js and Express, and integrated with various third-party APIs.
- Utilized Agile methodologies and participated in daily stand-up meetings, sprint planning, and retrospective meetings.
- Worked closely with UX/UI designers to ensure the best user experience for the web application.
- Actively participated in code reviews and provided constructive feedback to peers.
